 Planner's Initials and Date: _____ Engineer's Initials and Date: _____
 Sent to Special Services _____ LDIA Format _____

Sewer Information

You may view the Flow Generating Chart for sewer information by going to the New Castle County Department of Special Services on-line webpages or by clicking on the link below.

Flow Generating Chart

Developer may opt to utilize either the formula method or the cost estimate method to establish the amount of the required performance guarantee.

Formula Method:

- Applicants may provide surety in the amount of \$2 per square foot of gross floor area for non-residential development. By electing this method, requests for initiation of a LDIA may accompany initial construction plan submission.
- Attached homes and condominiums will be assessed at \$2,500 per lot or dwelling. Single family homes will be \$3,500 per lot.
- These amounts represent the 120% surety per Section 31.820 of the Unified Development Code.
- Surety requirements for other types of development will be determined as more data becomes available. These surety amounts are subject to change and adjustment as more data becomes available and experience warrants.

Breakdown must be attached.

Cost Estimate Method:

- The applicant may submit project specific cost estimates and surety in the amount of 120% of the cost estimate.

Estimate breakdown must be attached (Refer to Section 31.820 of the UDC.)

LDIA for Old Code Plans

- Applicant must provide surety in the amount of \$1,000 per acre.

Only applicable to subdivisions and land developments which are currently under review and were initially submitted prior to January 1, 1998.
